

THE FIRST USES OF FIRE

1 Listen, read and match.

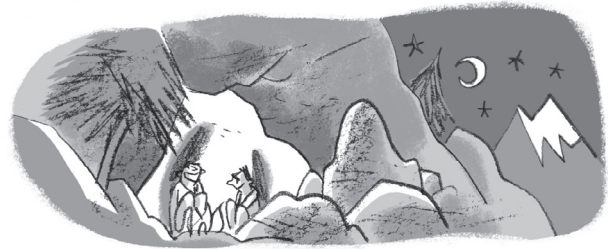

Paleolithic men have many uses for fire:

1 They can cook food: smoked or roasted fish and meat are yummy and healthy. ☐

2 It's easy to hunt animals: men burn vegetation, animals run away and fall into pre-prepared traps. ☐

3 With fire, caves are warm when it's very cold outside. ☐

4 Men can have light after the sun goes down and protect themselves from wild animals. ☐
