

WARM AIR GOES UP!

1 Listen and complete.

gases • air • oxygen • lighter • experiment

You can't see air, but you can feel it when the wind blows.

..... is a mixture of different One of them is very important:

Warm air is than cold air, so it goes up.

You can see this with a simple

2 Listen, read and... do!

You need:

– some thread

– a pencil

– scissors

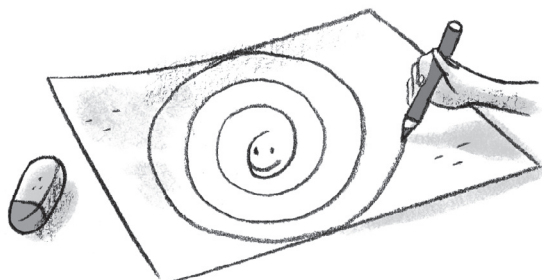

– a piece of paper

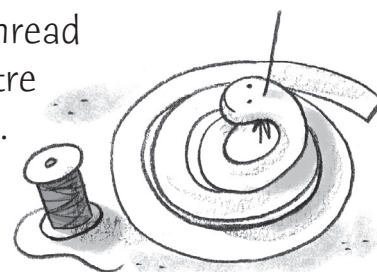

– a radiator

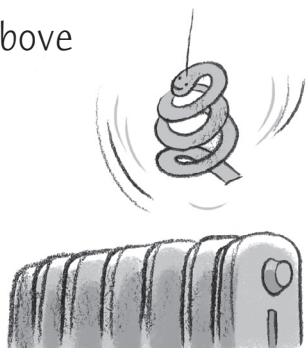

1 Draw a paper snake.

2 Cut it out and fix some thread in the centre of its head.

3 Hang it above the radiator.

4 The snake spins because warm air is rising around it!
